WHY WE CAN WORK ON OFFSHORE & ONSHORE PROJECTS

- We like our job and work on offshore & onshore projects
- We respect our business and observe ethical values
- Complying with high offshore standards and attaching importance to improvement and success
- Timely manner working and teams ready to work 7/24
- Strategic, practical and analytical fast solutions
- Experienced personnel in offshore fields, committed to high quality
- Compliance with national and international HSE & Pollution Regulation and Requirements
- Strong workshop facilities
- Certification and qualification

CERTIFICATION AND QUALIFICATION

- Certified by Ukas Management System ISO 9001, ISO 10002, ISO 14001, ISO 45001
- BOSIET (Basic Offshore and Safety Induction & Emergency Training)
- Employers Liability and 3rd Party Liability Insurance Policies
- Offshore Medical Certification
- DNV Certified Workshop
- DNV-ST-E271 2.7-1 Offshore Container
- IACS Member WPQR's (Welding Procedure Qualification Record)
- IACS Member Welder Certifications (UNI – EN ISO 9606 141;142;143;145 / 111 H-L045)
- AWS D1.1 Welding Procedures
- NDT applications MPI-UT-RT-VT (LVL1-2-3) and Ultrasonic thickness measurement
- Confined Space Entry Certification
- Scaffolding Inspection Certification
- Scaffolder and Work at Height Certification (LVL-3)
- Surface preparation and coating application certificates

CERTIFICATION AND QUALIFICATION

ONGOING CERTIFICATION PROCESS

- WPQR for AISI 4130 Grade Material with large schedule interval incl. PWHT for drilling operation pipes
- EN ISO/IEC 17020 Type A Accreditation from National Authority for Periodical Inspections of Offshore Containers

DEGEM CHRONOLOGICAL DEVELOPMENT ON OFFSHORE WORKS

2009

Operation Site : DS Deep Water Champion Black Sea Deepwater
Drilling Operation
Clients : Shell , Bourbon , SIEM , Turkish Petroleum

2018

Operation Site : DS FATIH SPS and Reactivation
Clients : Caspian Drilling, Global Offshore Engineering, Turkish
Petroleum, 3C Metal

2019

Operation Site : Rowan Norway Jack-Up Mediterrenian Shallow Water
Drilling Operations
Clients : Rowan Companies, Turkish Petroleum

2020

Operation Site : Rowan Norway Jack-Up Mediterrenian Shallow Water
Drilling Operations
Clients : Rowan Companies, Turkish Petroleum

DEGEM CHRONOLOGICAL DEVELOPMENT ON OFFSHORE WORKS

2020

- Operation Site : DS YAVUZ Mediterrenian Deepwater Drilling Operation
Client : Aroona Drilling
 - Operation Site : DS FATİH Mediterrenian Deepwater Drilling Operation
Client : Global Offshore Engineering
-

2021

- Operation Site : GSP Saturn Jack-Up Marmara Sea Shallow Water Drilling Project
Client : GSP Offshore, Turkish Petroleum
- Operation Site : DS KANUNI SPS and Reactivation
Client : Global Offshore Engineering
- Operation Site : ANADOLU 01 Jack-Up SPS and Reactivation
Client : Middle East Drilling
- Operation Site : ANADOLU 01 Jack-Up Marmara Sea Shallow Water Drilling Project
Client : Middle East Drilling

DEGEM CHRONOLOGICAL DEVELOPMENT ON OFFSHORE WORKS

2022

- Operation Site : DS YAVUZ Mediterrenian Deepwater Drilling
Operation
Client : Aroona Drilling
- Operation Site : DS KANUNI Mediterrenian Deepwater Drilling
Operation
Client : TP-OTC
- Operation Site : DS YAVUZ Intermediate Survey on Black sea
Client : Aroona Drilling
- Operation Site : Sakarya Gas Field Development
Client : SAIPEM, Subsea7, Polimar

2023

-
- Operation Site : Akçakoca Platforms on Akçakoca Gas Field
Client : Trillion Energy, SPM, Turquoise
 - Operation Site : DS KANUNI Intermediate Survey on Black sea
Client : TP-OTC

DEGEM CHRONOLOGICAL DEVELOPMENT ON OFFSHORE WORKS

2024

- Operation Site : SAKARYA GAS FIELD DEVELOPMENT PROJECT
PHASE-2 INSTALLATION AIDS FABRICATION SCOPE
Client : SAIPEM
- Operation Site : SAKARYA GAS FIELD DEVELOPMENT PROJECT
PHASE-2 VESSEL HW OPERATIONS
Client : SAIPEM
- Operation Site : TP-OTC FİLYOS FABRICATION WORKS
Client : TP-OTC

2025

-
- FPU-OSMANGAZI : DE-MOBILIZATION OF 10 MODULES
Client : Rönesans Endüstri Tesisleri
 - OFFSHORE STANDART CONTAINER FABRICATION
Client : TP-OTC

MAJOR OFFSHORE AND ONSHORE PROJECTS

Installation Projects

- Deployment of highly qualified and multi-disciplined teams to any location around the world to assist clients with the successful installation of upgrades and repairs onboard their assets.
- DEGEM installation teams are supported by fully equipped tool containers, which are tailored to suit each project. With HSE and Quality as the primary focus, each team is led by an experienced Supervisor and a proactive team of Project Engineers and Managers.
- Installation projects are precisely managed and monitored to ensure maximum efficiency with respect to schedule and cost. Emphasis on pre-installation planning and customer liaison to ensure seamless integration and minimize impact to ongoing vessel operations.
- Structural – purpose-built Structures, Equipment Foundations, Load Bearing Decks and Walkways.
- Qualified support crews – Scaffolders, Welders-Fitters, Fire Watchers, Painters, Quality Control Officers and NDT Technicians.

Installation Projects

- Deeptech ROV Foundation Installation Project on DS FATİH
- Deeptech ROV Foundation Intallation Project on DS YAVUZ
- Water Cooling System Installation Project for ROV on DS YAVUZ
- NOV Centrifuge Pumps Installation on DS YAVUZ
- Sewage Treatment System Installation on DS KANUNİ
- Heli Fuel Unit Installation on DS KANUNİ
- Installation Process with Welding for fixing Jack-Up to Dockwise on Rowan Norway
- Reactivation services for Trident 15 – ANADOLU-01 Jack-Up
- Foundation and Seafastening Installation for Derrick Removal and Assembly Project on DS YAVUZ
- IWOCS Equipment Foundation Removal from ROV Deck on DS YAVUZ
- Production Platform Extension Deck and Conductor Guide Installation on AKKAYA PLATFORM
- Boom Rest Removal and Reinstallation on AKCAKOCA PLATORM
- Flare Boom Fixing Point Cutting for Removal on AKCAKOCA PLATFORM
- 10" ROV Lars Container Lashing to top of 20" Offshore Container with Structural Anlysis

MAJOR OFFSHORE AND ONSHORE PROJECTS

Piping Projects

-In line with the demands of our major customers, we have a totally closed workshop within Yalova Shipyard Region which very close to pier.

This workshop provides easy transfer of the finished product to customer by sea.

Products fabricated at Degem Workshop can be loaded to a ship or a barge which can be berthed to pier having 170 mt x12 mt dimensions.

Cranes having 15 tonnes of SWL are available on the pier for loading products to ships.

Workshop at Yalova is totally 3000 m2 and equipped with CNC cutting machine, jigs for block production and other equipments needed for forming steel structures. 2x 10 tonnes of gantry Crane inside workshop also enables transfer of heavy components within the workshop.

Pipe & mechanical workshops and blasting hall are nearby the workshop.

This layout ensures that production is carried out in a safe, protected and fast manner and allows the completed product to be transferred easily to customer

Zağonos Paşa Welding Works

As part of this project, the foundation fabrication, assembly, and welding works for the sonar reflector system located on the ship's hull were carried out. The system was prepared to securely fix the sonar reflector arm and ensure its stability during operation. All of the materials used in the project were supplied by DEGEM.

The winch used in the operation of the sonar reflector system was assembled and fixed to the ship's hull. During the welding works, the following tasks were performed:

MAJOR OFFSHORE AND ONSHORE PROJECTS

PROCEDURES PERFORMED

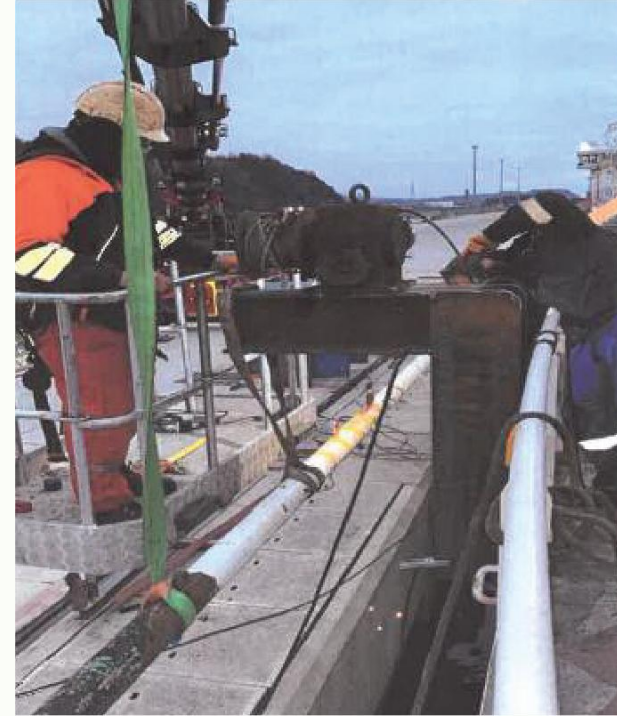

- Placement of the winch on the foundation
- Checking the assembly position
- Welding of the winch to the ship's hull
- Welding of the winch to the ship's hull

The winch used in the operation of the sonar reflector system was installed and secured with welding.

The following operations were performed:

- Placing the winch on the foundation
- Checking the installation position
- Securing the winch connection points with welding
- Preparing the foundation H-profiles according to the required dimensions
- Marking and positioning the H-profiles appropriately on the ship's hull
- Performing the fit-up of the foundation H-profile elements
- Performing checks and adjustments to ensure the structure is properly aligned
- Placing the pipe belonging to the sonar reflector arm on the foundation
- Checking the correct alignment and angle of the pipe
- Securing the pipe to the foundation connection points
- Manufacturing of support brackets to secure the pipe line belonging to the sonar reflector system.

MAJOR OFFSHORE AND ONSHORE PROJECTS

Manufacture and assembly of a sandwich platform: A total of eight bent locks were welded to the platform, four on each side, and the welds were then ground. Nondestructive testing of the bent lock welds was performed by Alfa Norm using the MPI method. Subsequently, the welding work on the pedestrian walkway connection next to the platform was completed, and MPI tests were performed again by Alfa Norm.

The sandwich platform was then lifted by crane and placed on top of the container. Finally, the installation of the stairs, railings, and walkway, including gratings, was completed.

Baris,

I was very proud of your guys today.
It is really a great improvement. Your performance on this project so far can totally be compared to 3C Metal.
Keep going!!!
